Dear Deborah,

Thanks so much for lending me this binder of information. All the points that were made were well thought out and well documented. I strongly agree with the NPA's stand on not using lindaine, not overusing the other pediculocides, not using lice sprays, and being wary of unproven remedies such as vaseline and herbal oils. As I continue to work on the American Academy of Pediatrics statement on head lice with the Committee on School Health and the Committee on Infectious Diseases, I will work on getting consensus on these points. I will keep in touch with you during the process, and contact you if I need any further clarification.

Thanks again for your help!

Sincerely,

Barbara L. Frankowski, MD, MPH
